Tuff-Bot - *the Rugged Robot* is the latest addition to Terrapin's line of coding robots. Use Tuff-Bot in the classroom or take it where other classroom robots can't go, whether that be the hallway, gym, playground, ballfield, or even the woods! Oversized wheels allow it to traverse uneven terrain. Built-in obstacle avoidance guides it get around barriers. Multiple speeds make it adaptable for operation in a range of environments.

Program Tuff-Bot via on-board buttons, remotely via a free

- 1) Students measure distance Tuff-Bot moves with one forward button push and run command.
- 2) Create map on floor with painters tape using measurements from first step.
- 3) Groups switch roles (maze makers / maze runners)
- 4) Reconvene to discuss tips/tricks/questions.etc.
